

Announcing ...

Project Connect is adding a new feature to our website!

On December 1, Project Connect will publish an **online searchable database** of vendors providing specialized services to nonprofits.

Organizations looking for technology-based services such as technology management assistance, training, project consulting and more will be able to find organizations in their area that provide these services and contact them directly.

We thank all of our funders who have supported the mission of Project Connect and the customers who have demonstrated the importance/value of nonprofit technology training and assistance.
